100 YEARS RACE PROVEN PROTECTION

Valvoline has been on the track since racing of automobiles started and has been working with the engineers, drivers and racing teams to develop products which increase performance and withstand the high demands placed on those racing engines. Valvoline incorporates all those lessons into the consumer products that made the Valvoline name synonymous with automobile lubrication.

What makes Valvoline products different is that we don't start with crude oil and refine it ourselves. Instead, we put those resources and time into searching the market for the best oil bases, making us one step ahead of our competitors. Valvoline is the only motor oil company that passes all 5 gasoline tests for API and ILSAC and we can do that because our development labs include testing facilities which allow greater freedom and flexibility in innovation.

What makes Valvoline different as a company is our history and company culture. Our history speaks for itself as Valvoline is the most recognized brand name in automotive lubrication with a customer loyalty that is second to none. A big part of that loyalty also comes from the fact that Valvoline puts the needs of the customer first. From great products to great service in the quick lube and auto maintenance market – Valvoline has a history of excellence.

2T OIL

Valvoline only uses the highest quality base oils and the most technologically advanced additive systems to provide our customers with lubricants of unsurpassed quality. Our products are proven to provide added performance, longer life and better protection for your vehicle. Furthermore, Valvoline tests each batch of oil during the blending process. On-site quality assurance coordinators make certain that product specifications are maintained without exception.

DURABLEND™

Valvoline Durablend 2T is premium motor oil formulated with the use of synthetic technology for two-stroke engines. It is specially formulated to reduce smoke and provide superior protection. Pre-diluted for easier mixing and may be used both injector and pre-mix applications. Use fuel/oil ratios as specified by the engine manufacturer up to 100:1. Durablend 2T fulfils the following specifications: API TC, JASO FD, and ISO L-EGD.

SYNPOWER® **FULL SYNTHETIC**

Valvoline SynPower 2T is premium full synthetic motor oil for two-stroke motorcycle engines. It is specially formulated to reduce smoke and provide superior protection. Pre-diluted for easier mixing and may be used both injector and pre-mix applications. Use fuel/oil ratios as specified by the engine manufacturer up to 100:1. Synpower 2T fulfils the following specifications: API TC, JASO FD, and ISO L-EGD.

ALL-CLIMATE

High quality conventional motor oil. Formulated for year round performance. Proven and trusted technology for a broad range of diesel, petrol and LPG engines

All-Climate fulfils the following specifications: ACEA A3/B4, API: SL/CF

SYNPOWER FULL SYNTHETIC

Premium quality full synthetic motor oil. Formulated for ultimate performance and protection under all operating conditions. Designed to fulfill the latest standards of leading engine manufacturers.

Formulated for Volkswagen Euro 4 and 5 engines with DPF technology (Diesel Particulate Filter). The product fulfils virtually all VW specifications and is suitable for engines with WIV system, for extra-long drain intervals up to 30.000 km or 2 years. Recommended for use in modern VW, AUDI, Seat and Skoda gasoline and diesel engines.

4T MOTOR OIL

4STROKE DURABLEND MOTORCYCLE OIL

Valvoline DuraBlend 4T is a high performance motor oil for four-stroke motorcycle engines. It is formulated with the use of synthetic technology. The product is recommended for all motorcycles where API SL or JASO MA fluids are specified.

DuraBlend 4T is specially formulated to meet the requirements of all leading engine manufacturers and provides optimal protection against wear and carbon deposits. DuraBlend is wet clutch compatible. The product fulfils the JASO MA-2 demands for optimum friction performance.

SYNPOWER FULL SYNTHETIC

Valvoline SynPower 4T is a high performance fully synthetic motor oil for four-stroke motorcycle engines. The product is recommended for all motorcycles where API SN or JASO MA fluids are specified.

SynPower 4T is specially formulated to exceed the requirements of all leading engine manufacturers and provides superior protection against wear and carbon deposits. SynPower 4T provides a quick cold start and smooth lubrication, even under very cold weather circumstances. It is wet clutch compatible. The product fulfils the JASO MA-2 demands for optimum friction performance.

4T MOTOR OIL

GEAR, ATF, FORK OIL

GEAR OIL

Valvoline gear oil is a synthetic multi-vehicle gear oil that maximizes the quality of shifting. The excellent cold flow properties give a smoother gear shift at low temperatures. Gear oil provides an excellent synchronizer performance giving extended synchroniser life and shift comfort.

ATF HEAVY DUTY

Valvoline Heavy Duty ATF PRO has increased low-friction properties, even under very cold conditions. This product is recommended for mix fleets.

SYNPOWER

Valvoline SynPower Fork Oil is premium fully synthetic fork oil for Motorcycles, Scooters, Mopeds and Quads. It is formulated to provide smooth fork action and optimum damping, even under hard circumstances like off-road usage. This fully synthetic fork oil offers smooth damping at very high and very low temperatures due to its high viscosity index.

The product protects the suspension against wear, corrosion and oxidation and has excellent seal compatibility.

MAINTENANCE

COOLANT

Valvoline coolants have been tested to provide the same superior protection and long life as the original fluid. Valvoline's coolants are available in both organic acid technology (OAT) and hybrid organic acid technology (HOAT) formulations in red, green and blue covering all vehicle applications.

Not all coolants are made the same. Choosing the right coolant, tested and proven to meet industry standards, is essential to the long term protection of an engine cooling system. Valvoline works closely with the world's leading vehicle manufacturers to understand the requirements of today's engine technology.

BRAKE & CLUTCH

High quality brake fluid is essential to ensuring effective stopping power. Most vehicle manufacturers recommend changing brake fluids every two years to optimise braking performance and protect system components. Top quality Valvoline brake fluids are available for all driving conditions and brake systems, including disc, drum and anti-lock braking system (ABS) applications. Choosing Valvoline brake fluid is your guarantee of advanced performance and system protection.

Valvoline brake fluids are high quality, non-mineral fluids based on glycol ethers, formulated specifically for hydraulic brake systems. The high boiling points of Valvoline brake fluids mean they are safe for use within the brake system and can be mixed with other brake fluids with similar specifications. The hygroscopic properties of Valvoline brake fluids absorb water that slowly lowers the boiling point.

ENGINE CARE

Valvoline deliver maximum value to consumers and workshops by providing superior professional-grade products to help perform value added automotive services. From fuel system cleaners to engine flushes, Valvoline optimise services while generating incremental workshop revenue. Valvoline have been designed to improve vehicle performance and protection.

GREASE

The Valvoline range of greases include products specially designed for use in automotive, heavy duty, marine, agricultural, farming and industrial equipment. Developed using the highest quality base stocks and the latest additive technology, Valvoline greases provide superior lubrication properties. The performance, life and reliability of your vehicle and equipment is very sensitive to the quality of the lubricants chosen. Grease has a vital part to play in offering protection that can keep your vehicles and equipment operating efficiently. The Valvoline range consists of greases that cover virtually all kinds of applications on your vehicle, machine or equipment.

MAINTENANCE

Valvoline offers a great range of high quality technical sprays that work as problem solvers. From maintenance products and cleaners to tools for dismantling and assembly. These are essential products any workshop must have.

CARBURETOR CLEANER

Valvoline Carburettor Cleaner is a blend of selected solvents, carefully formulated to maximize cleaning power on carburetors, chokes, PCV valves and throttle linkages. Carburettor Cleaner is safe for oxygen sensors, catalytic converters and electronically-controlled carburetors.

BRAKE CLEANER

Brake Cleaner is a powerful aerosol with assisted cleaning agent that removes all dirt and dust from brakes and electric starter motors instantly, leaving no residue behind. It is also an all-round degreaser and may be used on clutch discs, pressure plates, electric motors, switches and contacts.

Tectyl™

Tectyl Multipurpose Amber is a wax based, solvent cutback corrosion preventive compound. The product has good water displacing properties and good penetration, making it very suitable as a versatile corrosion protective for a wide variety of applications: Automotive, Marine, Household and Industrial.

Tectyl Underbody Coating Bronze is a solvent cutback, wax/asphaltic based, corrosion preventive compound. The product is suitable to be applied to the underbody of vehicles.

CHAIN-LUBRICATION

The latest development in chain lubrication technology, providing long-lasting anti-wear protection with excellent anti-fling properties. The synthetic components in the product create a long lasting lubricating and protecting film on the sprockets to ensure maximum chain and sprocket life.

White Synthetic ChainLube is easy to use on motorcycle chains, either on- or off-road, mopeds, bicycles, garden equipment, agriculture and industrial use. White Synthetic ChainLube penetrates easily into either O-ring or X-ring designed chains. The product is O-ring safe. White synthetic ChainLube protects chains against extreme pressures and shock loads in wet, salty, acidic or alkaline environments.

PENETRATING OIL

Valvoline penetrating oil is a high quality pressurized lubricant with Good penetrating properties to loosen rusted parts. Valvoline penetrating oil contains graphite and MoS2 and is moisture repellent.
