SUPERTEC

TUNING PARTS

Supertec

De Supertec V-snaar is een basis snaar in een aantrekkelijk prijs segment. De krachtige vezels in het rubbermengsel geven de snaar een hoge treksterkte met een lage rekfactor. Kwalitatief doen de snaren niet onder voor een “standaard” V-snaar die af-fabriek met de scooter geleverd wordt.

Supertec

Die Supertec Riemen ist eine Basis Riemen in einem attraktiven Preissegment. Die kräftigen Fasern in der Gummimischung verleihen den Riemen eine hohe Zugfestigkeit bei geringem Dehnungsfaktor. Qualitativ sind die Riemen konkurrenzfähig mit einen “Standard” Riemen, die mit dem Scooter ab Werk geliefert wird.

Supertec

The Supertec V-belt is a basic belt in an attractive price level. The powerful fibres in the rubber mixture are giving the belt a high pull strength and a low stretch factor. The quality of the belt is the same for a “standard” V-belt that’s being assembled on a new scooter.

DAYCO

Dayco

V-snaren van Dayco zijn kwalitatief goede snaren van Italiaans fabricaat. Dayco snaren worden daarom ook door een groot aantal vooraanstaande scooterfabrikanten gebruikt voor 1e montage op veel Europese scooters. Hiermee heeft Dayco bewezen een perfecte allround snaar te zijn.

Dayco

Riemen von Dayco sind hochwertige Riemen aus Italien. Dayco Riemen werden daher auch von einer Vielzahl führender Scooter-Hersteller für die 1. Montage auf vielen europäischen Rollern verwendet. Damit hat sich Dayco als perfekte Allrounder Riemen erwiesen.

Dayco

V-Belts from Dayco are good quality belts from Italian made. Dayco Belts are being used by several prominent scooter manufactures for the assembly on many European scooters. Dayco has proven to be a perfect all-round V-belt.

V-BELTS

MKX-BELT

MKX-Belt

De V-snaren van MKX-Belt zijn versterkt. Daarmee zijn ze geschikt voor zwaar en intensief gebruik. De extra trekkoorden geven de snaar een zeer hoge trek sterkte met een lange levensduur.

Voordelen:

- Hogere weerstand bij schokken
- Minder snel slijtage
- Vermindert slippen

MKX-Belt

MKX Riemen sind verstärkt. Dadurch eignen sie sich für den schweren und intensiven Einsatz. Die zusätzlichen Kordel Züge verleihen den Riemen eine sehr hohe Zugfestigkeit mit einer langen Lebensdauer.

Vorteile:

- Höhere Stoßfestigkeit
- Weniger schneller Verschleiß
- Reduziertes rutschen

MKX-Belt

The MKX V-Belts are reinforced. This gives the belts extra strength and make them suitable for heavy and intense use. The extra drawstring give the belt a very high pull strength and a long lifetime.

Benefits:

- Higher shock resistance
- Less wear and tear
- Reduces skidding

V-Snaar Shimmen

Waarom shimmen?

Niet alle merken V-Snaren en variateurs hebben een gelijke maatvoering als de originele V-Snaar of variateur.

Na het vervangen van een V-Snaar of variateur is het van belang te controleren of de V-Snaar gelijk ligt met de buitenkant van de glijbus.

De eventuele ontstaande afwijking zijn te corrigeren door het plaatsen van shim's.

Een juiste afstelling voorkomt het stuk gaan van de V-Snaar of snelle slijtage.

Antriebsriemen ausdistanzieren

Warum ausdistanzieren?

Nicht alle Riemen und Variatoren haben die exakt gleiche Masshaltigkeit wie das Originalteil.

Nach dem erneuern eines Riemens oder Variators ist es deshalb wichtig zu kontrollieren, ob der Antriebsriemen buendig mit der Gleitbuchse abschliesst.

Die eventuell entstandenen Abweichungen sind mit dem Einsetzen von Distanzscheiben zu korrigieren.

Eine korrekte Einstellung verhindert schnellen Verschleiss oder sogar die Zerstörung des Riemens.

V-Belt Shimming

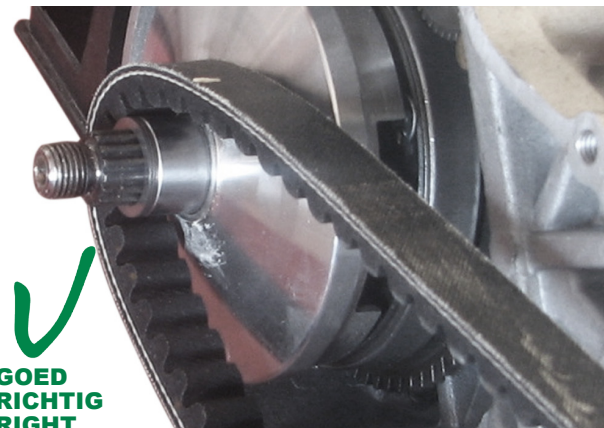

Why Shimming?

Not all the V-belts and variator brands do have measurements that's equal to the original V-belts or variator.

After replacing a V-belts or variator it is important to check if the V-Belt is aligned with the outside of the Variator-coil.

If there is space between the belt and coil, you can correct it by placing shims.

A correct adjustment avoids the breaking and quick wear and tear of the belt.
